

Exhibit A — Overlap Matrix: Carbon Mining Exchange vs. MSSC Prior Art

Accessed: August 27, 2025 (America/Chicago)

Website Claim (verbatim excerpt)	URL/Section	Observed	Overlap with MSSC	Relevant MSSC Date(s)	Notes
...r microbial sump system alone has proven significantly more effective than traditional aerobic systems in reducing methane emissions from agricultural waste.	Homepage	2025-08-27	Higher potential	2025-03-28 (MSSC)	Direct overlap
...mbiotic Sump Technology — A proprietary system that utilizes a diverse community of microorganisms to break down organic matter, producing a nutrient-rich sludge and a gas stream that can be captured and used for energy.	Technology page	2025-08-27	Higher-oxygenated	2025-03-23, 2025-06-08	Proprietary
...ansforms the farm pond into an ecological asset, generating revenue through the sale of carbon credits and the production of bio-fertilizers.	Technology page	2025-08-27	Medium-to-High	2025-03-22 (MSSC)	Proprietary
...arbon Coherence Score" used to determine the environmental impact of various agricultural practices, allowing farmers to optimize their operations for both profitability and sustainability.	Technology page	2025-08-27	Medium	2025-03-22 (MSSC)	Proprietary
...ys farmers up to \$10,000 per acre... verified carbon credits.	Home page	2025-08-27	Low-to-Medium	2025-06-08 onward	Conceptual overlap
...land-grabbing and displacement of local communities.	Home page	2025-08-27	Low-to-Medium	2025-06-08 onward	Conceptual overlap

Conclusion: Multiple statements on the Carbon Mining Exchange website overlap materially with preexisting MSSC concepts, terminology, and system architecture documented in our logs and June 2025 patent-style draft.
